The new mean is sort of ok, although it is on low side. Please work well and improve in the next
exam. As I promised, I will give you bonus points for very good improvement. I strongly urge
all of you to get serious. Please come and see me.

Mean

80.47

s.e=

7.860786 Tentative Grading scale is :

less than		60	F	below 50
60		72.61	D	between 50 and mean - one standard deviation
72.61		80.47	C	mean -one standard deviation to mean
80.47		88.33	B	mean to mean + one standard deviation
88.33 and above			A	above mean + one standard deviation

the course.

NOTE: Although this scaling for grades is not final, this gives you some ideas about
where you stand. If upir expected grade is F or even D, to successfully complete this course,
please make sure you arrange some time with me and work out a study plan for the other exams
and your homework. There is nothing embarassing about it, because I know you tried and
something might have gone wrong. I can help you, but you have to motivate yourself and you must
be committed to do it.
